OUR WIDE RANGE OF PRODUCTS

Vianens' ventilation systems excel by a variety of advanced technical features making them a high-performance, low maintenance solution even for the most demanding environments.

Canopies can be produced in seamless lengths of six meters and are entirely of stainless steel 304 satin finish. Vianen manufactures its own lighting fixtures and high efficiency, flame retardant, Fecon grease extraction filters.

- The Vianen hoods are double skinned and insulated according to customer requirements.
- Vianen has its own UV technology with unique safety features.
- The Vianen Fecon filters stops fire from and entering the duct work.
- The maximum pressure drop over each Fecon filter is maximum 60 Pa. This simplifies the selection of the fan.
- The Vianen hoods are equipped with hanging brackets for easy installation.
- Short delivery times when required.

Wide range of products

OUR FACILITIES AND EQUIPMENT

Vianen uses the most advanced CAD/CAM programming systems available. AutoCAD and SOLID Works, which enable us to excel in our industry and allows us to draw, design, rotate, flip mirror parts and integrate other parts into one program.

This utilizes materials in the most efficient manner, reducing the unit price, to make the item more competitive, and even allows us to nest multiple parts, punch in sample components to check for accuracy, thereby eliminating the waste of materials.

Facilities and equipment

INTENSIVE RESEARCH AND DEVELOPMENT

The in-house test facility at the factory establishes the efficiency of our design configurations prior to installation.

We extend a warm welcome to customers to visit the test facility.

INNOVATION

The commitment and firmness undertaken over years have been leading for Vianen to become an internationally renowned brand which exports the reliability and the quality of Made in Holland with resolution and method in a growing perspective of internationalization.

We are proud to introduce the Vianen Victoria System which is customised to monitor the operation of your kitchen and include functions for the Vetec efficiency unit and the Maestro Kitchen Management System.

QUALITY YOU CAN TRUST

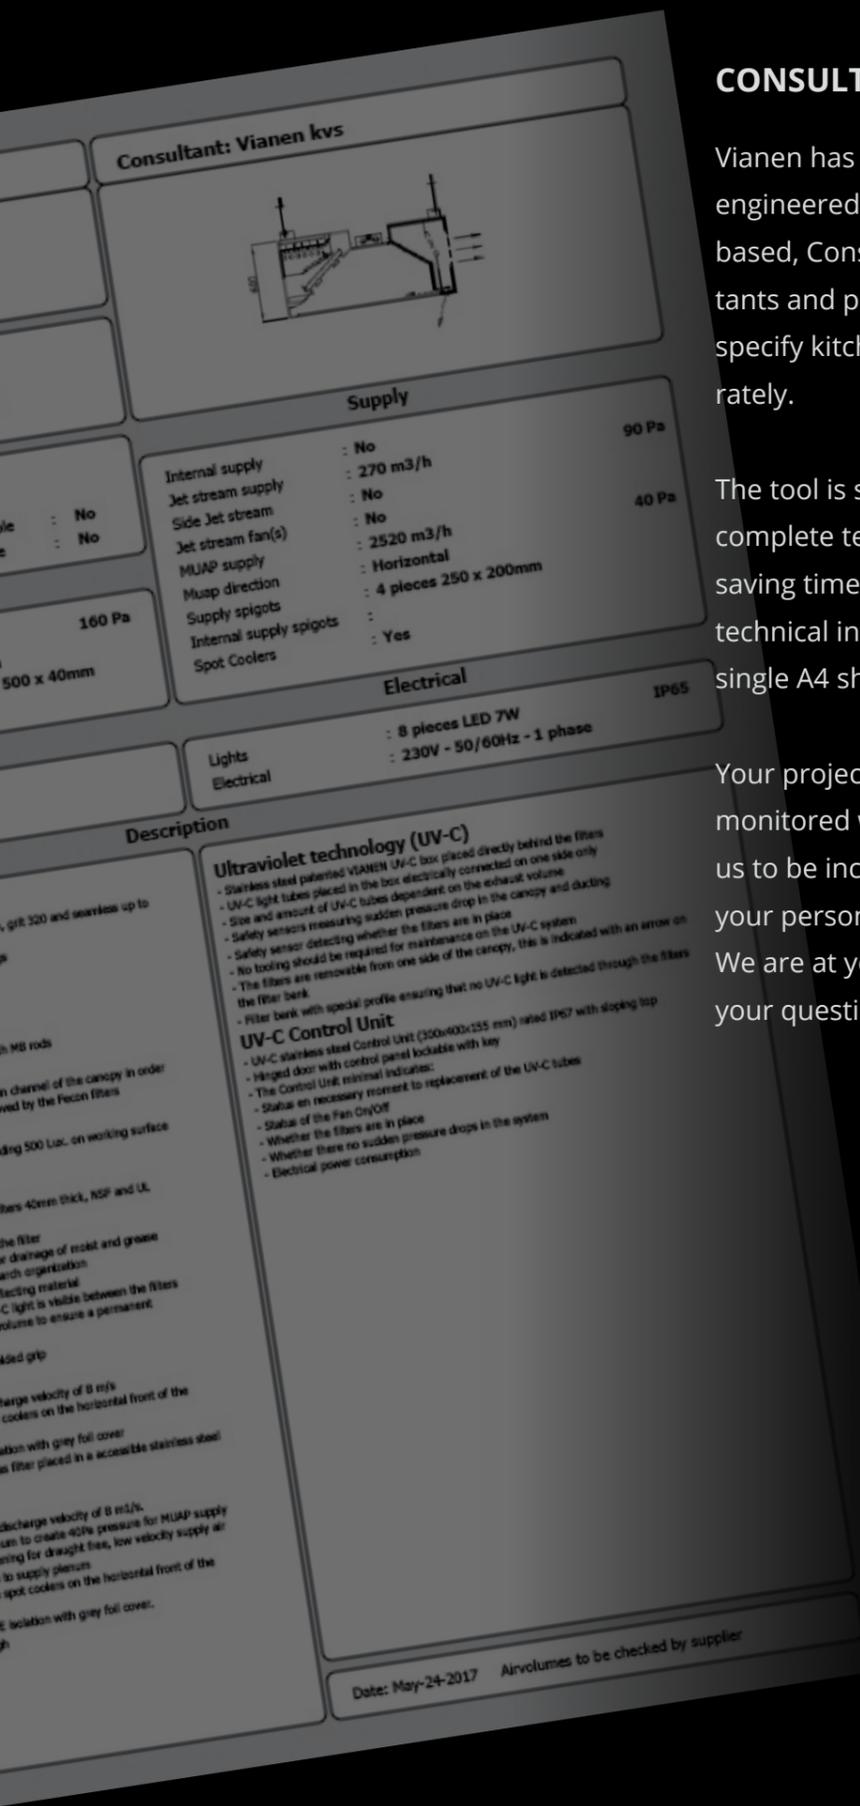

Our skilful team are fully aware that competitiveness comes not from price alone but also from the quality delivered.

Vianen has its own in-house production facility. All phases of manufacturing are carried out and managed in total autonomy, permitting direct quality control over the entire production process.

Excellent raw materials, optimization of costs, new models put rapidly into production, and whenever necessary immediate action on one or more manufacturing phases, allows us to offer convenient prices and the guarantee of full product monitoring, advantages that only an integrated production cycle can ensure.

With a reputation for fast lead times, a comprehensive environmental policy, and cutting edge manufacturing techniques, Vianen offers true reliability and quality you can count on.

Research and development

CONSULTANT TOOL

Vianen has successfully designed and engineered the first computerised, web based, Consultant Tool for use by consultants and professional kitchen suppliers to specify kitchen ventilation quickly and accurately.

The tool is simple to use and generates complete tender documents within minutes, saving time and money. All the relevant technical information is presented on a single A4 sheet.

Your projects can also be controlled and monitored within this system. Please contact us to be included on the list of users and for your personal access code.

We are at your service to answer all your questions.

MEMBERSHIPS AND STANDARDS

Vianen follow guidelines as set out in international codes, which are often based on the ASHRAE Standards. This standard outlines ventilation requirements for acceptable quality.

VIANEN APPROVALS

- ISO 9001:2008 certification
- ISO 14001
- UL
- CE
- VCA
- NFPA

Products tested by TNO:

Netherlands Organisation for Applied Scientific Research

MEMBERSHIPS

- FCSI
- B&ES
- ASHRAE
- TVVL
- NEN 1010

HOW WE VALUE OUR CUSTOMERS

- To service and anticipate our customer needs.
- To know what it is that our customers want.
- To listen to our customers.
- Help customers understand our systems.
- To do what we say we are going to do.
- Deal with problems.
- Make it simple for customers to complain.
- We value your complaints as it gives us an opportunity to improve.

DESIGN ENGINEERING

Our custom designs are produced to meet the most specific requirements. Drawings for your projects can be created by our engineering team from an idea, sample product, or even a rough sketch.

The high-quality finishing provides an attractive solution for open kitchens and new features are constantly being added such as new energy saving LED lighting or the new Culina canopy specially designed for front cooking stations.

SUSTAINABILITY

Vianen supports and advises in the field of sustainability. Ventilation is important for the safety and comfort of your employees and customers. Vianen have the expertise and experience to balance your ventilation needs with optimal "green" ventilation solutions. A few ways of "going green" that will benefit you is the implementation of:

- Vianergy II - The latest innovation in canopies. Energy savings of 28% can be reached - tested by TNO as per ASTM standards.
- Vetec - exhaust on demand systems.
- Canopies with our unique water misty recycle system.
- Ecology units.
- Victoria - intelligent monitoring system.

The Maestro kitchen management system creates an awareness of energy consumption and identifies approaching maintenance issues of equipment so unnecessary costs are avoided.

The Orchestra Health and safety panel is designed for the health and safety monitoring of the kitchen.

Sustainability

OUR SERVICE COMMITMENT

Our people are committed as a team. Quality service is the job of every employee. Vianen doesn't just sell a product, we operate on the principle that customers buy into a relationship with a supplier, one which works as a partnership for the long term.

Professional advice and information is always available from our technical sales engineers who are trained to deliver a high level of customer service which includes support, technical design and on-site support, maintenance, spare materials and training services.

- Professional Project Management
- Professional Installation Teams
- After Sales Support
-  victoria intelligent monitoring system

Commitment

HISTORY

Founded almost four decades ago as a manufacturer of kitchen ventilation, Vianen has developed into one of the leading players in high-tech ventilation systems for professional kitchens. Well established on a global scale with branches across Europe and abroad, we are aiming at further expanding our international presence.

WHAT WE DO

We manufacture and install our ventilation products and air filter systems all around the globe in restaurants, hotels, cruise ships, airports, hotels, hospitals, prisons, exhibition centres, and public buildings.

Constant innovation and training of our project managers and engineers ensure that our customers receive a high quality, expert installation with no mess or hassle. It's what our clients like most about what we do.

History

MISSION

To be a leader in the professional ventilation market. To do this by harnessing the enthusiasm, passion and diligence of a team that is young and capable of coping with these changes and seizing the amazing opportunities it brings. Vianen is the icebreaker in its sector, ready to dress its products with technology, design and a unique style that makes them instantly recognizable.

VISION

To excel in quality, to surpass previous levels of service, to encourage creativity and innovation, to protect the environment. Vianen cares about the environment and pays more attention to energy saving.

Along with other major brands in the hospitality industry, Vianen is ready to lead the market towards using high energy saving products, which results in reduced consumption and actual savings for the end consumer.
